Port releases revised tariff schedule of 2011/12

GeelongPort has announced increases to the tariff rates applying to customers using the Port for the year commencing 1 July 2011. These increases range between 3.7% and 7%, with the highest charge increases relating to the wharf based charges.

Business Manager - Patrick Ports, John Murray said, "It is important in both the near and long term to ensure that the port assets are available to support the industry of the region. The majority of these assets were built in the 1960's and the repair profile is growing as is standard for marine based assets of this age."

GeelongPort continues to work with all customers to minimise long term costs and maximise port throughput.
